

## SureFoot® Mat

*The SureFoot® Mat improves 'Welfare for animals and people' by providing a safer surface under foot!*

### How the SureFoot® Mat solves the problem

1. Reduces the OH&S risks to jockeys by providing a 'safer' surface;
2. It provides a soft and 'forgiving' surface that reduces impact and protects the hoof's soft tissue from unnecessary trauma and damage;
3. It's rubber compound improves the grip available to the animals, reducing slippage by as much as 89%;
4. The unique diamond pattern helps provide a secure footing for the animals, significantly reducing the incidence of slippage and catastrophic tendon damage;
5. **SureFoot®** mats are also quicker and easier to clean - saving valuable water and time.

### Slipping and Spreading

Asphalt, concrete or other unstable surfaces in equine facilities can be very slippery and dangerous. Combined with the use of metal horse shoes it is a significant concern for operators. Impacts include:

- Potential injury to jockeys when horses fall over
- Spreading as they attempt to get up causing catastrophic damage to leg tendons and lower spine
- Destruction of the animal (replacement cost)
- Distress caused to other horses in the surrounding environment

### Easy Installation

**SureFoot®** Mats are easily installed over any concrete, metal or timber surface using **SureFoot®** fixing products.

### A Good Investment

**SureFoot®** Mat is a simple, yet powerfully effective product that helps operators maintain a high level of safety without the need for ongoing management or intervention.

Once installed, **SureFoot®** Mats continue to deliver financial and facility management benefits for many years.

### Positive Occupational Health & Safety Standards

The use of the **SureFoot®** Mat significantly increases the safety to jockeys, trainers, stable hands and other people working around horses.

Data collected from facilities that use the **SureFoot®** Mat shows outstanding improvements to a safer operating environment.

### Cleaner Environment

The use of **SureFoot®** Mats provides exceptional improvement for a cleaner environment. The level of dust from dirty surfaces and the harbouring of harmful bacteria in bedding products is completely eliminated.

### Hard Wearing Rubber Compound

The **SureFoot®** Mat is manufactured using a hard wearing and extremely durable rubber compound which has been especially formulated for this purpose. The compound blend of recycled and new virgin rubbers also features superior shock absorbing properties which provides outstanding protection for animals.

### Cost Savings

Using **SureFoot®** Mat in an equine facility costs significantly less for bedding and labour.

### Applications include:

- Breezeways / laneways
- Crossover tracks
- Underpasses
- Equine swimming pools
- Loading ramps
- Racing complex day stalls
